DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Notice of intention to drill this well was filed on September 22, 1960, and approved September 30, 1960. The original application was filed for an approximate depth of 12,000 feet to test the Devonian. By geologic correlation the Devonian formation is expected at approximately 12,100 feet. Therefore, the proposed total depth is hereby amended to 12,400 feet. The well was drilling at 11,582 feet at 6:00 a. m., February 10, 1961.
