Attention: Bill Gressett

Dear Bill:

Today we are running pipe in the Rayroux #1A, SE $\frac{1}{4}$, NE $\frac{1}{4}$, Sec. 24, T21S, R26E, NMPM. As you are aware this has been shut in since March of 1969.

We plan to start pumping this well within the next few days and would appreciate if your office would send us the necessary forms to reinstate the well on a producing basis. Barber Oil Inc. will be the transporter of the oil produced and it will be put in our sales tank at the Barber lease.

Best personal regards

BARBER OIL INC.
Robert S. Light

RSL:dl

Bob -
On the enclosed forms C-103 show what work was
performed to put the well on production, and the amount
of oil ^{+water} produced per day in order for us to assign an allowable.
We will also need ^{to know} where the produced water will be disposed
of.
Bill.
