Well No. **2** is located **2510** ft. from **N** line and **2510** ft. from **E** line of sec. **8**  
**NE** **SE** **SW** **NE**  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
**Wilcox** **May** **New Mexico**  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is \_\_\_\_\_ ft.

**DETAILS OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We dugged 20 sacks of cement at 912 ft up then filled with mud up to 800 feet. Put in 5 sacks of cement and filled with mud to top, then screwed 7" casing into 7" pipe into hole and plugged to top of marker. Used 1 sack of cement to cement marker in place. The location is not ready for inspection as the pit has not been leveled off yet as we are waiting for another location to send bulldozer out to level pit off at that time.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
