Artesia, New Mexico

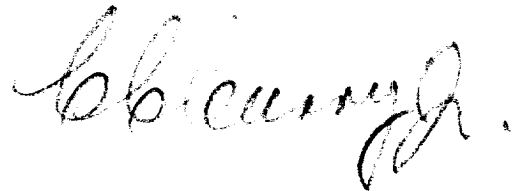

Dear Sirs:

I am forwarding to you in this letter a copy of our well log as prepared by my partner and ~~driller~~ of our well, Byrl Binkley. This well was drilled as Binkley-Curry Murray No 1 located in Lot 14 of Sec 1 T21S R27E 3300 feet from S line and 1980 feet from from W line of the above section.

Since the present lease on this property expires at a close date I would like to know what sort of plugging program I would have to comply with to get released from the USF&G Drilling Bond. We propose to leave all casing in this well, as it will be re-drilled by a local operator as soon as the present lease expires and I don't believe he could get a good a seal as we have in the string now in the hole.

I will gladly furnish any additional information you may deem necessary by letter or you can always find me at the grocery store on the south hiway.

Sincerely,

A handwritten signature in cursive script, appearing to read "B. Curry".
