DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The well will be drilled with cable tools to the regular pay zone in the Yates formation at about 525 feet.

Surface water will be cased off at about 375 feet.

Production string will be cemented before drilling the pay zone.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
