DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Well will be drilled with cable tools to test the Yates and upper Seven Rivers formation at about 525'. Surface water will be cased off before drilling prospective zones and casing will be cemented for completion if the test is found productive.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
