(Field)

Ellet

(County or Subdivision)

New Mexico

(State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Propose to drill to 530 feet. Expect to run approximately 400 feet of 8 inch casing and cement. Expect to set oil string (7 inch) at approximately 520 feet, or through gas, if gas is encountered.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
