Artisia, New Mexico.,

Dear Mr. Miller:-

I wrote Hobbs several weeks ago, about the matter of plugging the well, had to plug it quickly to try to save what little oil we had there, and have been waiting for the permission, which I thought had to be had before sending in form C-105, am sorry I did not understand just how this had to be done.

In any event, would appreciate your approving it promptly as our bond runs out early this month and I want to get it cancelled and get another to drill another well in the southwest corner of the same 40 acres.

Thanking you very much for attending to this for me soon, I am,

Yours very truly,

R S Magruder

Mr. Yarbrough's letter of April 7th indicated that only form C 102 was to be furnished immediately which was done, then, I traced the matter & just have your letter - Please let me know if I cannot send form C 103 on in and get the matter closed out so can get in application for another well - Thanks

R S Magruder
