DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

As per report of Oct. 20, 1954, the above well was shot from 880' to 900' with 40 quarts of solidified nitro on March 12, 1955. After shot well will be cleaned out to bottom. Pump and tubing will be installed and well will be tested.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
