

May 29, 1958

A. B. Schrock
821 Mundy Avenue
El Paso, Texas

Dear Sir:

We have received your letter of May 27, 1958 relating to plugging of your No. 1 State well, in Section 21-20S-28E., Eddy County New Mexico.

METHOD OF PLUGGING

Rule 202 of State Wide Rules & Regulations

Before any well is abandoned, it shall be plugged in a manner which will confine permanently all oil, gas, and water in the separate strata originally containing them. This operation shall be accomplished by the use of mudladen fluid, cement and plugs, used singly or in combination. The Exact location shall be shown by a steel marker at least four inches in diameter set in concrete, and extending at least four feet above ground level.

You will need 10 sack cement plug at bottom of hole, 10 sack cement plug at a depth of 500 feet, another 10 sacks where any pipe might be knocked off.

The only person I know of that does this type of work is C. O. Fulton, 712 Clayton Ave., Artesia, New Mexico.

If this office can be of any service to you in the future please call on us.

Very truly your,

OIL CONSERVATION COMMISSION

M. L. Armstrong,
Supervisor, District No. 2
