Following telephone permission to plug and abandon the well, the bottom hole water was shut off by dumping five sacks of calceal and ten sacks of cement with the bailer. The operation was shut down for three days when the tools were run into the hole. The tools stopped 60' off bottom. The hole was bailed dry and the water found to be shut off. The hole was then filled with mud.

Following the plan stated in "Notice of Intention to Drill" to land casing and pull the same in case the hole was dry, 206' of 8⁵/₈" casing and 607' of 7" casing was pulled.
