ARTESIA OFFICE

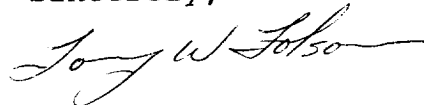

Mr. Williams

Vision Energy, Inc. Filed a request with your office April 28, 1982 to flow test the above well for a 60 day period. This test was to establish the economic potential for the repair of the casing leak.

Per our conversation Vision Energy would like to ask for an additional 60 days to produce this well. At that point one of the previously mentioned procedures would be used to repair the problem.

Vision Energy would continue producing under the same conditions as before. Their has been no communication from below the packer in the daily checks.

Sincerely,

Tommy W. Folsom  
Vice President Operations  
& General Manager
