Mr. Mose Armstrong
New Mexico Oil Conservation Commission
Carper Building
Artesia, New Mexico

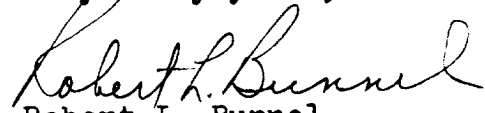

Dear Mr. Armstrong:

As agent for Mr. G. E. Conley of Santa Fe, New Mexico, I have recently treated and completed a well on his Federal lease in Sec. 33, T.20S., R.28E.

At the moment we are faced with the problem of disposing of approximately 350 barrels of load oil which was used in the fracing process. This load oil was purchased from the Neil H. Wills-Russell field and of course he has paid the taxes and royalty thereon. I understand that there is a separate form necessary for a matter of this kind and would appreciate it if you would send me some of them.

I would also appreciate it if you would furnish me with a complete set of Oil Conservation Commission forms necessary for the completion of the well, such as "Request for Allowable", and so forth.

Very truly yours,

Robert L. Bunnell
