Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.

Re: Saladar Unit-- Well #3
Federal Unit # 14-08 0001-16916
Eddy County, NM

Dear Sir:

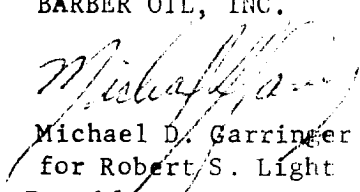

Mike Williams of the Artesia office of the Oil Conservation Division was in my office this morning and informed me their records show Well Number 3 in the above captioned property as an injection well. We are aware that some time ago Mr. George D. Riggs (previous operator) had filed with the OCC an intention to convert the well from production to injection. The well name and number at that time was the Hughes Federal #4. The well was never converted to injection and to this day is a producing well. Therefore the enclosed reports, Form 9-331 do not describe any proposed action to convert to a producing well.

We are not aware of the status of the well in the U.S.G.S. records. Therefore, we are sending these reports so that if your records are in error they can be corrected. If your records do not show the well as an injection well you may simply throw the reports away.

In conclusion, Well #3 of the Saladar Unit is now and has always been a producing well.

Very truly yours,

BARBER OIL, INC.

Michael D. Garringer
