(1/4 Sec. 1	and Sec. No.)	(Twp.)	(Range)	(Meridian)				
Wildcat		E	$\mathrm{d}\mathrm{d}\mathrm{y}$	New Me	exico			
()	Field)	(Cor	anty or Subdivision)	(State or	Territory)			

The elevation of the derrick floor above sea level is 3203 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is planned to drill an 8-3/4" rotary hole to an approximate depth of 150' where 7" surface casing will be set to shut off caving sand and any surface water which may be encountered. 6-1/4" rotary hole will then be drilled to test the Yates Sand at approximately 700'. If oil is encountered, 5-1/2" oil string will be cemented. If test results in a dry hole, surface pipe will be pulled and well will be plugged in accordance with U.S.G.S. Regulations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

NSTRUCTIONS FOR COMPLETION

- 1. Operator shall furnish and certify to the information called for in Section A.
- 2. Operator shall outline the dedicated acreage for both oil and gas wells on the plat in Section B.
- 3. A registered professional engineer or land surveyor registered in the State of New Mexico or approved by the Commission shall show on the platthe location of the well and certify this information in the space provided.
- 4. All distances shown on the plat must be from the outer boundaries of Section.
- 5. If additional space is needed for listing owners and their respective interests as required in question 3, Section A, please use space below

^{* &}quot;Gwner" means the person who has the right to drill into and to produce from any pool and to appropriate the production either for himself or for himself and another. (65-3-29 (e) NMSA 1953 Comp.)
