(State or Territory)

The elevation of the derrick floor above sea level is ..... ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Old total depth 1597 ft. and plugged back to 1160 ft. many years ago. The following casing was run when drilled: 12 1/2 inch @ 169 ft. & mudded, 80" @ 390 ft. & mudded, 8-5/8" @ 1086 ft. with 30 sacks cement.

The rods and tubing were pulled from 1110 ft. pumped 35 sacks cement down thru 2 inch tubing knocked off @ 8-5/8 inch off at 800 ft and pulled. Pulled all of the 10 inch from 390 ft, ran 10 sacks cement at 700 ft. Pulled 110 ft. of 12 1/2 inch. Filled hole with mud between plugs. Cleaned up location and cemented required 1/4 inch marker.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
