Wilcat **Eddy County** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **3262** ft. **Gr.**

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was purchased by Daya Operating Company. It was drilled by Dean H. Stolts. 4 1/2" O.D. casing was set at a depth of 1146'. The top of the cement was approximately 350'. The 4 1/2" casing was perforated from 955-965'. The hole was filled with heavy mud and a 20 sack cement plug was spotted at 980'. Another 20 sack cement plug was spotted at 350'. A 10 sack cement plug was placed in the casing at the surface. None of the 4 1/2" casing was pulled. The location was leveled and a marker was placed at the well. This was done in accordance with verbal permission obtained from Mr. Brown on 7-14-61.

RECEIVED

SEP 13 1961

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
