(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Artesia, New Mexico,

February 24, 1945

Well No. 2 is located 550 ft. from N line and 660 ft. from E line of sec. 3030 30 Sec. 30
(1/4 Sec. and Sec. No.)20 3.,
(Twp.)29 E.
(Range)N.M.P.M.
(Meridian)West-Getty
(Field)ddy
(County or Subdivision)New Mexico.
(State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Ran 273' to top of 10" casing, to shut off surface water.
Ran 416' of 8" casing, instead of 600', because of quicksand encountered that was not expected.
Ran 650' of 7" casing, to use as production string for gas, instead of 900' of 7" casing, to use as production string for oil.
Did not drill to 1200 feet, as encountered Getty zone sulphur water at 947', and plugged back to 790', and completed well as gas well.

7" casing was frozen in hole by quicksand, after pulling out of strings and therefore unable to cement same, as originally planned.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
