Yates Federal
Well No. 2 is located 330 ft. from NE line and 1650 ft. from E line of sec. 18

SE 1/4 Sec 18 (Sec. and sec. No.) 20.5 (Twp.) 29N (Range) 104W (Meridian)
Wilcox (Field) Edgy County or Subdivision New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 3257 ft. topog

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Will drill 10" rotary hole to about 50' and cement 2 joints of 8 5/8" with about 5 sac as a conductor. Will drill 6 3/4" rotary hole to the top of the Yates Formation expected at a depth of about 920'. Russell sand will be cored. If oil is found 4 1/2" casing will be cemented on top of the Russell Sand and cemented to the surface with about 150 sac of cement. If well is dry the hole will be plugged under USGS specifications.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
