### FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION

The well was originally completed in August 1942. 7" casing was cemented with 50 sacks at 1443' and 8-5/8" casing was cemented at 416' with 50 sacks.

It is intended to gun perforate 7" casing at about 700' (above the calculated point where cement should be on original cementing job in 1942) and circulate 7" casing from this point between the 8" casing to the surface. This measure is taken for protection of the salt section in the mines area.
