RECEIVED
OCD - ARTESIA
JUL 26 2001

Dear Mr. McClaine:

I have reviewed the application to inject for the subject well that was received by the Division on June 15, 2001. Please be advised that additional data will be required to process this application. Please submit the following described information, at which time I will resume reviewing your application:

- a) casing cement data for the four wells within the area of review:

In addition, any information regarding the integrity of the cement behind the production casing in the proposed disposal well would be useful. In the absence of any data, the Division may require that you run a cement bond log or cement evaluation log on the subject well. You may also be required to conduct a radioactive tracer survey after commencing injection in order to demonstrate external mechanical integrity.

If you should have any questions, please contact me at (505) 476-3466.

Sincerely,

David Catanach
Engineer
