The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We will cement approximately 500 feet of 8-5/8" 24# seamless casing and cement to the surface. We will set approximately 1600 feet of 7" 20# casing and cement with sufficient cement to bring the top of the cement to the cellar and will use the 7" casing for the production string.

Proposed total depth is approximately 1700 feet

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
