Well No. 2-Federal is located 1980 ft. from N line and 660 ft. from W line of sec. 33
C SW 1/4 NW 1/4 Sec. 33 T. 20S R. 30E. N.M.P.M.
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Undesignated Eddy New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3361 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We will cement approximately 600 feet of 10-3/4 inch 32.75# casing to the surface. We will set approximately 1460 feet of 8-5/8 inch casing and cement with sufficient cement to bring the top back to the bottom of the 10-3/4 inch casing, and will use the 8-5/8 inch for the production string.

Proposed total depth is approximately 1750 feet.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
