The elevation of the derrick floor above sea level is 3519 ft. Est.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Confirming telephone conversation on June 4, 1952 with your Mr. John A. Frost and our S. J. Scarborough. 20" OD 9 3/4" Grade H-40 Steel casing will be set at approximately 655 feet (Rotary Measurement) and 633' (Ground Measurement) on June 6, 1952. The casing to be run in 2 1/2" hole and cemented w/900 sacks. Casing will be landed in Anhydrite Formation at the top of the Salt Section. The cement will be allowed to set a total of 24 hours of which the first 12 hours will be under pressure. Casing test and water shut-off test to be conducted as prescribed by New Mexico Conservation Department Rule R-111.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Title _____

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that this is crucial for ensuring transparency and accountability in the organization's operations.

2. The second part of the document outlines the various methods and tools used to collect and analyze data. It highlights the need for a systematic approach to data collection, ensuring that all relevant information is captured and properly documented.

3. The third part of the document describes the process of data analysis and interpretation. It explains how the collected data is processed and analyzed to identify trends, patterns, and key findings that can inform decision-making.

4. The fourth part of the document discusses the importance of communication and reporting. It emphasizes that the results of the analysis must be effectively communicated to the relevant stakeholders, ensuring that they understand the findings and their implications.

5. The final part of the document provides a summary of the key points discussed and offers recommendations for future work. It stresses the importance of continuous improvement and the need to regularly review and update the processes and methods described in the document.
