**Midland, Texas, September 26, 1944**

**Frank S. Skidmore**

Well No. **1** is located **660** ft. from **[S]** line and **660** ft. from **[W]** line of sec. **24**

**SW 1/4 Sec. 24** **20-S** **31-E** **N. M. P. M.**  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

**Wildcat**

(Field)

**Eddy**

(County or Subdivision)

**New Mexico**

(State or Territory)

The elevation of the derrick floor above sea level is **3518** ft. **Approximately.**

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

In our notice of intention to drill this well, we indicated that our intention was to cement 13-3/8" casing at 100' and mud 10-3/4" casing at approximately 400'. Development in this area shows that this program would not adequately protect all of the fresh water sands, as some of them are below 100'.

Therefore, we desire permission to change our program and cement the 10-3/4" casing at approximately 400' to protect all fresh surface water sands. Above confirms telephone conversation and approval.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
