(Field)			(County or Subdivision)		(State or Territory)

The elevation of the derrick floor above sea level is 3573 ft. (estimated)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill Shell-Texas Crude Big Eddy Unit 1-30 as a 7500-foot Bone Spring test as follows:

Drill 17 1/4" hole in the Red Beds or in the top of the Anhydrite to approximately 700' & cement 13 3/8" casing (Circulate cement to surface).

Drill 12 1/4" hole into the Tansill dolomite at approximately 2010' & cement 9 5/8" casing (Circulate cement to surface).

Drill 7 7/8" or 8 3/4" hole into the Bone Spring at approximately 7500' & cement 5 1/2" casing.

This test will be drilled in accordance with KNOCC Order R-111-A.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Shell Oil Company (& Texas Crude Oil Company)Address Box 815Roswell, New MexicoBy Rex C. CabanissTitle District Exploitation Engineer

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry, no matter how small, should be recorded to ensure the integrity of the financial data. This section also covers the need for regular audits and the role of the accounting department in providing timely and accurate information to management.

The second part of the document outlines the procedures for handling cash and credit transactions. It details the steps for recording sales, purchases, and payments, as well as the methods for reconciling bank statements and credit card statements. The importance of maintaining proper documentation for all transactions is also stressed.

The third part of the document discusses the treatment of assets and liabilities. It covers the depreciation of fixed assets and the valuation of inventory. It also addresses the recognition and measurement of liabilities, including accounts payable and long-term debt.

The fourth part of the document discusses the treatment of equity and income. It covers the calculation of net income and the distribution of dividends to shareholders. It also addresses the treatment of equity transactions, such as the issuance of new shares and the repurchase of treasury stock.

The fifth part of the document discusses the treatment of taxes. It covers the calculation of income taxes and the treatment of tax-exempt income. It also addresses the treatment of taxes on capital gains and losses.

The sixth part of the document discusses the treatment of foreign currency transactions. It covers the translation of foreign currency amounts into the reporting currency and the treatment of foreign exchange gains and losses.

The seventh part of the document discusses the treatment of non-current assets and liabilities. It covers the recognition and measurement of intangible assets, such as patents and trademarks. It also addresses the treatment of non-current liabilities, such as pension obligations and deferred tax liabilities.

The eighth part of the document discusses the treatment of contingencies and commitments. It covers the recognition and measurement of contingencies, such as lawsuits and guarantees. It also addresses the treatment of commitments, such as contracts and leases.

The ninth part of the document discusses the treatment of discontinued operations. It covers the recognition and measurement of discontinued operations and the presentation of discontinued operations in the financial statements.

The tenth part of the document discusses the treatment of changes in accounting principles and estimates. It covers the recognition and measurement of changes in accounting principles and estimates and the presentation of changes in accounting principles and estimates in the financial statements.
