DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Propose to drill 17" hole to approximately 400' and run 13-3/8", 48# casing and circulate cement with 500 sacks. Drill a 12-1/4" hole to 3,000' and run 9-5/8", 36# casing and cement with sufficient cement to circulate. Then drill 8-3/4" hole to approximately 11,100', and if shows warrant setting casing, set 7" at total depth. Completion methods will be determined by shows encountered while drilling.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
