Odessa, Texas

Attention: Mr. L. N. Dunnivant

Re: Federal Dooley, Well #1 M,  
24-20-29.

Gentlemen:

We are in receipt of Form C-123, requesting the creation of a new gas pool as a result of the completion of the subject well. It is, however, not our usual policy to create pools with outlines as irregular as those you have proposed, especially where only one well is involved. Normally in creating new pools for gas wells we use increments of 160 acres, the standard spacing and proration units for gas wells. Unless otherwise contacted by you, we will proceed in creating a pool for this well in normal fashion.

Very truly yours,

R. L. Stamets

Re: Federal Energy, Well No. 1  
14-12-127

Gentlemen:

We are in receipt of Form C-123, requesting the creation of a new gas pool as a result of the completion of the subject well. It is, however, not our usual policy to create gas pools with outlines as irregular as those you have proposed, especially where only one well is involved. Normally in creating new pools for gas wells we use increments of 160 acres, and standard spacing and production units for gas wells. In cases where wider horizontal spacing is required, we will proceed in creating a pool for this well in normal fashion.

Very truly yours,

R. M. Edwards
