DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Intend to drill with cable tools to a total depth of approximately 1800 feet to test the upper San Andres formation. The following casing program is anticipated:

- 30 feet of 13 3/8" csg. - cemented
- 250 feet of 10 3/4" csg. - mudded
- 685 feet of 8 5/8" csg - mudded

If production is encountered, a casing and cementing program will be submitted to the U.S.G.S. for approval

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
