Re: Ralph Lowe

Hanson-Federal

#1-N 34-205-37

This is a shut in gas well.

The attached C-110 is the ~~only~~ authorization for 500 barrels of condensate produced while testing. That is all that we have.

This well is carried in our statistical report with a production. ^{Please} Let us have a copy of your C-110 (now C-104).

Thanks,
