(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We plan to drill a 9900' Morrow Sand test for gas. 9 5/8", 36%, casing will be run to approximately 2200' and commuted to surface. 7', 26%, casing will be run to approximately 9900' and commuted to surface or surface string.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
