If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

GS Marathon proposes to abandon the Morrow gas zone in this dual completion well. The Morrow zone has been shut-in since October 1984, due to depletion. A 7" CIBP with 30' of cement will be set at 9300' to abandon the Morrow Formation. The well will then be produced as a single Upper Penn gas well.
