Dear Bill:

In reply to your memo at the time you returned our authorization to transport oil from PCA and Russell you made mention of the fact you did not receive a change for the Turner #4 well or the Wills #35 well nor any of the wells in the Barber Pool. At this time we are not producing the Turner #4 or the Wills #35 as they are temporarily shut in. Barber Oil is still the purchaser from all the Barber Pool as we pay royalties on production and then in turn sell out of a large sales tank off the leases from Barber.

If you have any further questions, please advise.

Very truly yours

Bob Light
