The elevation of the derrick floor above sea level is **3355** ft. **3351** (Ground level)

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

TD 645' Hole size 6 3/4".

Will set a cement plug from 0 to 20 feet and 500 to 600 feet. The latter plug will be above the Queen sand which was topped at 600 feet. This procedure is based on verbal instruction by James Knauf, September 15, 1963.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations are commenced.
