

NEW MEXICO OIL CONSERVATION COMMISSION
PACKER SETTING REPORT

I, Lewis R. Boyce, being of lawful age and having full
Name of party making report
knowledge of the facts hereinbelow set out do state:

That I am employed by Kerr-McGee Oil Industries, Inc. in the capacity of
Engineer, that on February 28, 1965

I personally supervised the setting of a Baker Model "K" snap set packer
Make & type of packer
in Kerr-McGee Oil Industries, Inc., Martha Creek,
Operator of well Lease name

Well no. 1 located in the Indian Basin field,
Eddy county, state of New Mexico, at a subsurface depth of
7271 feet, said depth measurement having been furnished me by
pipe measurement by Lewis R. Boyce;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.
