DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On June 13, 1964, ran 1570' of 8 5/8" casing and cemented with 75 sacks of regular cement, using 7 sacks of calcium chloride and 1 sack gel. Cement did not circulate. Used grout to fill annulus behind 8 5/8" casing to surface. Test showed water shut off complete. On April 24, 1964 ran 1576' of 8" casing and cemented with 100 sacks of Incon with 1/2 gal. gel. Temperature survey and found top of cement at 1340'. Perforated 2 holes at 1470'. Re-cemented with 100 sacks of Incon with 1/2 gal. gel.

Ran temperature survey and found top of cement at 1340'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations are commenced.
