Re: Packer Leakage Test
Lowe State Gas Com #1
F-36-21-23
Cerf Federal #2
F-10-21-27

Gentlemen:

Attached per your request dated July 15, 1987 is a packer leakage test for our Cerf Federal #2. The test shows no communication between the Morrow and Strawn completions.

You had also requested a packer leakage test on the Lowe State #1. The Lowe State #1 is currently temporarily abandoned and no longer completed as a dual. Attached is a copy of the C-103 acknowledged by the Oil Conservation Division showing the abandonment operation which was conducted in September 1986.

Please feel free to call if you need additional information.

Very truly yours,

A handwritten signature in cursive script, appearing to read "Jesse L. Roberts".
