

NEW MEXICO OIL CONSERVATION COMMISSION
PACKER SETTING REPORT

Adopted
RECEIVED

MAR 23 1965

**O. C. C.
ARTESIA, OFFICE**

I, Monroe V. Roberts, being of lawful age and having full
Name of party making report

knowledge of the facts hereinbelow set out do state:

That I am employed by Penroc Oil Corporation in the capacity of
V. Pres. Production, that on 12/3/63 and 1/3/64, 19 64

I personally supervised the setting of a Otis Type WA Wire Line Packer and Otis
Type MA Retrievable Packer respectively, Make & type of packer
in Penroc Oil Corporation, Indian Federal,
Operator of well Lease name

Well no. 1 located in the Indian Basin Upper Penn. and Morrow
Field,
Eddy county, state of New Mexico, at a subsurface depth of
WA packer at 9050 feet, and
MA packer at 7340 feet feet, said depth measurement having been furnished me by

Welex and Otis Engineering Corporation;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.

Monroe V. Roberts
