

Mr. M. L. Armstrong  
Oil Conservation Commission

Page 2

February 10, 1966

February 2 filing. You will note that the condensate produced with gas delivered to Southern Union is stored on the lease and that condensate produced with gas sold to Natural Gas Pipeline Company is delivered to the Marathon Plant through their gathering system.

The Upper Penn is not at this time a split connection though we did file to show this on December 8, 1965. On our filing of January 27, we corrected this to show that all gas and condensate produced from the Upper Penn was delivered to the Marathon Plant.

The C-104's filed to date on the above well should reflect the information contained above. If they do not, please let us know what is needed and we will file again.

Very truly yours,

PENROC OIL CORPORATION
