13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

Marathon Oil Company is planning to change the configuration of the piping on this well. The liquids will be handled as before. The gas will flow from the wellhead to a separator, located at the wellhead, where it will be measured and then transported by flowline to a compressor and dehydration unit, located at the Indian Federal Gas Com #2 well site, (UL "J", Section 19, T-21-S, R-24-E). After being processed through the dehydration unit, the gas will be sent to the fuel gas header and then on to one of the satellite facilities' fuel gas system. The gas not needed for the fuel gas system will be transported via pipeline to Marathon's Indian Basin Gas Plant where it will be processed and sold at the tailgate of the plant. Please see the attached flow diagram of the proposed piping configuration.
