RE: Exemption From Annual Shut-In Pressure Test Requirement Bright Federal Gas Com #1 1650' FNL & 1682' FEL UL-G, Section 21-T21S-R23E API 30-015-10386

Dear Sir or Madam:

Please accept this request for exemption from OCD Rule 402, requiring an annual shut-in pressure test on natural gas wells. The subject well is a flowing well but current reservoir pressure is very low. When shut-in, a fluid level will rise in the wellbore often resulting in a slow and difficult return to prior gas production rates.

Thank you for your consideration of this request.

Sincerely,

offman everly

Beverly Hoffman Sr. Proration Analyst
