This well was tested for mechanical integrity on 1/24/96 and failed. Marathon intends to initiate work to repair the leak by 2/22/96. The casing leak will be isolated using a packer and RBP. The repair procedure will depend on the location of the leak. If the leak is high enough a joint may be backed off and replace. Otherwise the leak will cement squeezed. Upon repair of the leak the casing will be tested again for mechanical integrity.
