## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

**This test was spudded May 31, 1963.**

On June 1, 1963, 20" conductor pipe was set at 26' with six yards of ready-mix.

Ran 622 feet of 13" OD 46# casing. Set at 626 feet. Cemented with 200 sacks cement. Plug down at 7:30 p.m., August 6, 1963. Cement did not circulate.

On August 7, 1963, tried to get one inch pipe down side to pump cement. Could not get but 70 feet. Received verbal authority from U. S. G. S. to drill ahead and circulate cement prior to running intermediate string.

**I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.**
