Federal "X"
Well No. **1-16** is located **640** ft. from **[N]** line and **1980** ft. from **[W]** line of sec. **16**

SE1/4 Sec. **16** **20E** **29E** **N.M.P.M.**
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wildcat **Eddy** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is **3284** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I plan to drill a 1400' Seven Rivers test with rotary tools.

I propose to set approximately 100' of 7" surface casing with 30 sacks. This cement will circulate.

The oil string will be 4 1/2", set on bottom with 30 sacks.

All casing will be run and cemented under methods approved by the U.S. G.S.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
