Re: Multi-Point Back Pressure
Test for Gas Wells,
USA Emperor Oil Co.,
No. 1-F, 28-20-30
Wildcat Morrow Gas Pool

Dear Mr. Meek:

We are herewith returning the subject test report for corrections as follows: Packer setting depth should be shown. Casing pressure should not be shown when there is a packer. The compressibility factors and rates of flow need minor corrections. The (Pt) pressures in the left hand column of the Pressure Calculations should correspond to the observed tubing pressure plus 13.2.

Please advise this office as to where the six hundred pounds casing pressure came from.

If there are any questions on this matter do not hesitate to call upon me.

Very truly yours,

Oil Conservation Commission
