(Note: Report results of multiple completion on Well
Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

A CIBP was set at 7480' on October 16, 1986, in an attempt to eliminate excessive water production from this gas well. This well was producing from perforations at 7353'-7515'. The perforations from 7492'-7515' were abandoned. This well is now only producing from the perforations at 7353'-7466'.
