If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Chevron submits for your approval the installation of an additional rental compressor on the subject well to increase the gas production. The new Ajax DPC-180 reciprocating compressor will be powered by 180 horsepower internal combustion engine. The new unit will be installed in parallel to the existing rental Ajax DPC-300, which was previously approved on 6-30-93. Both units will be utilized for approximately one year and will not be installed permanently. The packaged unit will also be mounted on a structural steel skid surrounded by an ecology basin to contain fluid leaks and minimize environmental damage. It will be located on the existing well site and will not require additional surface disturbance. An updated facility process flow diagram is enclosed for your review.
