13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimate date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Chevron proposes to install a rental compressor on the subject well site to increase gas production. The reciprocating compressor will be powered by a 350-400 horsepower internal combustion engine. This unit will be utilized for approximately one year and will not be installed permanently. The packaged unit will also be mounted on a structural steel skid surrounded by an ecology basin to contain fluid leaks and minimize environmental damage. It will be located on the existing well site and will not require additional surface disturbance. The equipment will also be painted with BLM approved colors before installation on the location.

14. I hereby certify that the foregoing is true and correct.
