(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

It is proposed to perform a casing integrity test so that a request for renewal of the temporary abandonment status of this well may be filed:

1. Notify the Carlsbad BLM office 24 hrs. in advance of performing the pressure test.
2. Pressure test the casing to 500 psi for 30 minutes.

A previously filed intent to temporary abandon this well was approved 6/27/91 and the pressure chart was submitted to the BLM 9/18/91. As a result of this previous T&A action a CIBP is already set at 7530' and the wellbore is filled with packer fluid.
