Well #7, Sec. 19, T-20-S, R-31-E  
Maroon Cliffs, Morrow Gas Field.  
File: 400-WF

Gentlemen:

It is requested that the subject well be exempted from the state-wide rule requiring annual shut-in pressure tests.

This well is connected to Amoco, who in turn sells the gas to Potash Company of America. We have been requested to furnish gas continuously to the plant except during shut-ins. If the well is shut-in during October, as normal, we will obtain a 24 hour DWT on the tubing.

Yours very truly,

  
J. E. Pullig  
Division Manager
